OFFICE OF THE SUPERINTENDENT, GOVERNMENT STUD FARM, KUNIGAL.

Notification.

It is hereby notified for the information of the public that the exclusive right of collecting Minor Forest produce, such as yield of Tamarind, Mango, Wood Apple (Bela), Soapnut, etc., of the Government Stud Farm, Kunigal and the attached gardens and kavals for the year 1956-57, will be sold by public auction at the Farm premises by the Superintendent of the Farm on Monday, the 26th November 1956 at 3 P.M. subject to the following conditions:—

1 Each bidder, before he is permitted to bid in the public auction should deposit with the sale conducting officer, a sum of Rs. 50 in cash as earnest money. The earnest money deposit of the unsuccessful bidders will be returned after the close of the sale. The successful bidder shall, immediately after the close of the sale, pay one-fourth of the sale amount, together with the local and other cesses and sales-tax on the full sale amount. In default his deposit will be forfeited to Government and the right resold at the risk of the defaulter who should make good the loss that may result to Government thereby, but he shall not be entitled to any claim in the event of profit. Should the defaulter fail to make good the loss, the same shall be recoverable as arrears of land revenue.

2 The auction is subject to the confirmation by the Director of Animal Husbandry Services in Mysore, Bangalore, who reserves the right of accepting or rejecting any bid without assigning any reasons whatsoever.

3 Within a week from the date of intimating the confirmation of the sale, the successful bidder should pay the remaining sale amount in full and make his own arrangements for proper guarding of the trees. No complaint in this regard will be entertained and no compensation whatsoever will be considered. In default to pay the amount stipulated above, the amount already paid will be forfeited to Government and the right resold at the risk of the defaulter who should make good the loss that may result to Government and in event of profit he shall not be entitled to the same. Should the defaulter fail to make good the loss, it shall be recovered as arrears of land revenue.

4 Each bidder should see the yield and satisfy himself before the auction sale and any complaint received thereafter will not be entertained.

5 Any damage done to Government trees and other property on the Farm should be made good by the successful bidder.

6 The right of the sale should not be sublet or transferred.

7 Withdrawal of bid or lodging dispute of any kind will not be entertained, when once the bid is offered in the open auction.

8 The decision of the Director of Animal Husbandry Services in Mysore, Bangalore, shall be final and legally binding in all matters of dispute.

Sub.:—Supply of H. T. Metering equipment for Tungabhadra Dam (Electrical Department).

Gentlemen,

No. S.P.C. 50996-51045. Please be good enough to intimate your best prices and the earliest time of delivery for the materials described in the schedule noted below.

It should be distinctly understood that the acceptance by us of your quotation will be subject to the conditions following the last enquiry.

The quotations should be sent in duplicate with sealed covers duly superscribed "**Quotations for H.T. Metering equipment for Tungabhadra Dam (Electrical Department)**" with the above enquiry number.

This enquiry will be closed on the 30th November 1956.

SCHEDULE.

F.O.R. Bangalore

H.T. Metering Equipment.

General :—

Scope.—This specification covers manufacture, test and delivery of H.T. metering equipment, namely instrument transformers and meters required for H.T. supply to Tungabhadra Board, Kamalapura Project area and shall consist of the following :—

I. Instrument Transformers.
(a) Current Transformers.
(b) Potential Transformers.
II. KWH. Meters with Max. demand Indication.

1·02·00.—System.—Instrument transformers and meters are intended to be used on 3 phase 50 cycle 13·2 KV/11 KV. neutral earthed system.

1·03·00.—Whether conditions:—The equipment is intended to be installed in a place subjected to a variation of temperature between 45°C. Maximum in summer to 15°C. minimum in winter. Maximum humidity being 90 per cent.

1·04·00.—The equipment is going to be installed at an altitude of not more than 3,000' above the sea level.

1·05·00.—Irrespective of any thing said or omitted the equipment shall be suitable to the purpose intended and shall conform to the latest B.S.S. or other internationally accepted standard.

1·06·00.—The successful tenderer shall fully guaranteed for a period of ONE year from date of installation, the satisfactory operation of the equipment offered by him and shall agree to replace free of cost any item which may fail by reason of defective material, workmanship or design.

1·07·00.—Due importance will be given to a short time of delivery.

1·08·00.—The entire equipment shall be mounted on a panel and enclosed in a sheet steel housing, with provision to lock, and suitable for out of door installation.

1·08·01.—Suitable provision for entry of the leads to the cubicle such as porcelain bushings, cleats, etc., shall be provided.

2·01·00.—Instrument Transformers.

2·02·00.—The terminals of the instrument transformers shall be clearly marked by distinctive signs or letters.

2·03·00.—The temperature rise in any part of the instrument transformer shall be limited—20°C. above the ambient temperature of 45°C. When carrying continuously the rated burden. In any case the temperature rise shall not attain values which might endanger insulation.

2·04·00.—All the High Voltage tests specified in B.S.S. 81/1936 for instrument transformers shall be conducted and the test results submitted in triplicate for the purchasers' approval.

3·01·00.—Current Transformers.—The current transformers offered shall be insulated for voltage up to 13·2 KV.

3·01·01.—Short circuiting link on the Secondary shall be provided.

3·02·00.—The current transformers shall have a ration of 75/50/5 amps.

3·03·00.—The transformer shall be capable of carrying a burden of 15VA. continuously and shall be capable of carrying at least 20 per cent overload.

3·04·00.—The current transformers offered shall conform to accuracy class "BL" of B.S.S. 81—1936 and shall be suitable for metering purposes.

4·01·00.—Potential Transformers.—The potential transformers offered shall have the voltage ratio of 13·2 KV.—11 KV.—110 volts.

4·02·00.—The Potential transformers shall be capable of carrying a burden of 50 V.A. continuously.

4·03·00.—The transformers shall be capable of satisfactory operation under an overload up to 20 per cent over the rated voltage.

4·04·00.—The transformers offered shall conform to accuracy class "B" of B.S.S. 81—1936 and shall be suitable for metering purposes.

5·01·00.—Meters.—The meter offered shall be mechanically strong and suitable for its purpose, and shall give reasonable assurance of permanance in all mechanical, electrical and magnetic adjustments.

5·01·01.—The meters offered shall conform to B.S.S. No. 87—1955.

5·02·00.—The meter mechanism shall be completely enclosed in a dust tight non-gnitable and non-hygroscopic case, suitable for tropical climates.

5·02·01.—The case shall not be liable to distortion by normal changes of temperature, presence of moisture or other cases.

5·02·02.—The case front and sides shall be glazed, shall be of sufficient strength to afford adequate protection to the working parts against mechanical injury in normal use.

5·03·00.—The meters shall be provided with projecting screwed studs of sufficient length for fixing them to the matering panel.

5·04·00.—The meter shall be capable of being sealed conveniently and in such a manner that access to the working parts, to make electric or magnetic adjustments can only be obtained by breaking the seal and to effectively prevent unauthorised tempering.

5·05·00.—Provision shall be made for connecting to earth the case of the meter if of metal, and any metal part not completely insulated form internal mechanism and shall be ordinarily accessible when the meter is sealed and installed.

5·06·00.—One or more substantially glazed, dust tight windows shall be provided in front of the case in such a manner as to give a clear view of the register and also of those working parts the observation of which is necessary for rapid testing of the meter.

5·06·01.—It shall be impossible to remove the glass without breaking seal of the meter or breaking the glass itself. However to remove the glass, dismantling of the meter shall be unnecessary.

5·07·00.—Terminals shall be indelibly marked so as to indicate clearly the direction of current through the meter.

5·07·01.—The terminal of the meter shall be enclosed in a separate compartment with a cover suitable for sealing. The terminals shall be insulated with non-ignitable and non-hygroscopic material.

5·07·02.—Terminals shall be provided with a holding nut, a locking nut and adequate number of washers.

5·08·00.—A diagram of connections along with requisite information regarding connections shall be supplied with the meter.

5·08·01.—Every meter shall have a diagram of connections and correct phase sequence, firmly attached to some convenient part of the meter preferably to the inside of the terminal cover.

6·01·00.—The scale should be evenly divided over the range, zero at the left and maximum to the right. The deflection of the pointer should be from left to right. The markings shall be bold and be such as not to fade away with time. The thickness and width of markings shall be such as to render reading easy and without undue strain to the eyes.

6·01·01.—The value of each scale division shall be either 1, 2 or 5 or units measured or any decimal multiple of these numbers.

6·02·00.—Spring controlled instruments shall be provided with a suitable device, accessible from outside the case for adjusting the pointer to zero or other setting mark without risk of damage to any of the working parts of the instruments. This device shall be such that it can be employed with safety on working voltages.

6·03·00.—The meters are intended to be used with the instrument transformers referred to in clauses 3·02·00 and 4·01·00 of this specification.

6·04·00.—The V. A. burdens of the meters offered shall be as low as possible. All permanent magnets shall be of non-ageing type.

6·04·00.—All the H. V. tests referred in B.S S. 37—1937 shall be conducted and test results submitted in duplicate along with the tenders.

6·04·01.—The insulation resistance between all the electric circuits of the meter coupled together and any metal parts of the meter, which are accessible with cover on or off, other than current carrying parts and any parts electrically connected thereto, shall not be less than 5 megohms.

6.04·02.—The insulation resistance between the meter current circuit and meter voltage circuit, shall not be less than 2 megohms.

6·04·03.—The insulating materials between any and every two electric circuits and also between all the electric circuits taken together and any metal parts of the meter which are accessible with the cover on or off other than current carrying parts and any parts electrically connected thereto, shall withstand 2,000 volts RMS for one minute.

6·05·00.—The maximum demand meter shall be suitable to evaluate maximum demands integrated over half hour periods. A register shall also be provided to indicate the energy consumed in KWH.

6·05·01.—A seal or other means shall be provided on the resetting device to afford adequate protection against any unauthorised setting of the maximum demand pointer.

6·05·02.—The maximum demand meter shall be capable of recording a maximum demand up to 2000 KW.

6·05·03.—The stationary pointer indicating the maximum demand shall have a distinctive colour preferably red.

6·05·04.—The dial shall not be made of paper.

Conditions applicable to all the above enquiries.

1. The Stores Purchase Committee do not bind themselves to accept the lowest or any tender but reserve to themselves the right to select from any tender such articles as they may consider expedient to accept.

2. The tender must be accompanied by full specifications and details of technical data for the equipment offered, together with the description, drawings and literature.

3. Should an order be placed as a result of the tender, it should be distinctly understood that the materials should strictly conform to our specifications. In the event of materials not conforming thereto being supplied, the contractors will be required to replace the materials by the correct ones without extra charge.

4. The materials should be supplied within the time stipulated in the tender.

5. In case of dispute as regards the satisfactory performance or otherwise of the contract, the decision of the Stores Purchase Committee shall be final.

6. If any tenderer withdraws from his tender before the period of three months fixed for the acceptance or if the tenderer whose tender is accepted fails to execute the agreement and furnish the deposit of 5 per cent of the value of the contract, the earnest money deposited by him will be forfeited to Government. The earnest money of unsuccessful tenderers will be returned.

7. The prices quoted will hold good for a period of three months from the last day fixed for receiving tenders and in default of doing so, to pay the sum equal to 3 per cent on the aggregate amount of this tender as and by way of liquidated damages.

8. Failure to make supply, whether of a portion of the material or the entire quantity as per the terms of indent, or non-performance, or non-supply, in time or regularly, or supplying material which does not conform to the specifications, quality prescribed, or the sample approved or which is found defective in any other way or for breach of any of the conditions stipulated, will entail enforcement of one or more of the following:—

(i) Cancellation of the indent or order in part or in whole.
(ii) Imposition of penalty at the rate specified in the indent or if no such rate is specified, at a sum not exceeding 3 per cent of the value of the order, at the discretion of the President, Stores Purchase Committee.
(iii) Forfeiture or adjustment of Earnest Money or/and Security Deposit in whole or to the extent necessary or considered fit by the President, Stores Purchase Committee.
(iv) Recovery of extra cost, if any, incurred by the Departments in securing the material from other sources, by adjustment from money due to the defaulter or otherwise.

9. The articles and the quantities mentioned in the enquiry are only provisional and the Stores Purchase Committee reserve the right to place orders either for all the articles and for the quantity mentioned in the enquiry or for such of the articles and in such quantities as may be actually required at the time of placing the order and subsequently before the close of three months from the date of expiry of the enquiry and to close the enquiry thereafter. It is open to the S.P.C. to institute fresh enquiry even earlier, if it considers fit and desirable for satisfactory reasons.

10. Whatever may be the conditions of sale specified or indicated in the tender quotations, it is only the conditions indicated in the schedule of order and in the tender notification that will bind the Stores Purchase Committee or the Indenting Department and that, if any successful tenderer wishes that some other conditions quoted by him should also be accepted, he should specifically raise the issue as soon as the schedule of orders reach him and get the same accepted or clarified.

11. The successful tenderer shall be prepared to deposit a security amount not exceeding 5 per cent of the value of the order and to execute an agreement on a Mysore Government Stamp Paper of Re. 1-8-0 for the proper performance of the contract.

12. Quotations with firm prices will be preferred.

13. Sales-tax, if any, should be quoted separately.

14. No enhancement of prices will be allowed after the acceptance of the tender.

N.B.—Quotations will be opened at 2 P.M. on the next working day after the closing date of the Enquiry.

Note:—These conditions hold good for all the above enquiries of this office.
